

Bill Joiner

Comments from second public hearing

1 BILL JOINER: This is Bill Joiner.
2 I just wanted to agree with Jeff there for the
3 codification of ATU loading rates because that is a
4 real problem that I tried to mention earlier in the
meeting.

1 BILL JOINER: Yeah. This is Bill
2 Joiner again. I'd just like to comment on -- back
3 to application rates. Just the application rate of
4 leach chambers versus perforated pipe, that seems
5 to -- it's not real obvious.

1 BILL JOINER: And I know I just
2 made a comment on it, but it would be nice if we
3 could discuss sometime, speaking of application
4 rates, of the effective infiltration area of leach
5 chambers versus perforated pipe with drain rock.
6 I've commented on this before in my comments I've
7 submitted.
