

Carol Meyer

Id like to make you aware of my concern regarding the plan to truck ore from Tetlin to Fort Knox. In addition to the many safety concerns with so many trucks on our roadways, air pollution, and noise pollution. Have there been any studies done to see how this ore may impact the Fort Knox site? And is there any plan to reclaim the Manh Choh mine once all ore is extracted? What about accidents on the roadways? Who's cleaning that up? I strongly object to these permits and I hope there will be more transparency from our state. More time is needed to understand the full impact of this plan

Thank you for listening!!
