

Sarah Keller

Thank you for accepting comments regarding the permits associated with the Manh Choh mine plan. I simply ask for public hearings regarding the plans for the trucking route. There should be a full EIS or state equivalent to evaluate the plan and best practices for public safety.

Public safety should be of higher value than profits hence the route should be under review for hazards.

And in the course of a trucking accident resulting in a spill, there must be solid plans for remedial action.

I have more concerns but little time to write.

Thank you,

Sarah Keller 169 Eagle Ridge Rd Fairbanks, AK 99712
