I support Peak Gold's plan because it is a responsible and sustainable solution that will benefit our community. The plan includes reclamation and waste management plans that meet state and federal regulations, which will ensure the land remains safe and healthy for future generations. It also includes a comprehensive monitoring program to ensure the mine is running efficiently and working to minimize any environmental impacts.

Overall, I believe approving this plan is in the best interest of our community. It will create quality jobs, bring economic and social benefits to the area, and help ensure that the land is returned to an acceptable quality for future generations. Thank you for considering my opinion on this important matter.
