

Jill Yrjana

My name is Jill Yrjana and I am a resident of Tok. I have reviewed the Reclamation and Waste Management Plans and ask that you approve them so Kinross can proceed with the Manh Choh project. Kinross has shown themselves to be transparent with the community by holding numerous community update meetings and by following and going above and beyond on their environmental and safety programs. Kinross is moving forward with assistance in the areas of workforce development and employment readiness training. The community of Tok and the villages of the Upper Tanana Region need this mine and the economic stability that will come with it.

I ask that you move forward and approve these plans without delay so we can continue with this project and the improved way of life that will come with it.

Thank you.
