

Camille Davis

Greetings,

I am writing to support Peak Gold's Closure and Reclamation and Waste Management Plan for Manh Choh.

I live in Tok, Alaska, and this project will provide a positive economic and socio-economic impact through job creation, training, vendor partnerships, and patronage of local businesses. At each step of this process, Kinross, Peak Gold, and Mah Choh representatives have had open dialogues and shared plans about the mine, their strategies to safely begin the project, an overview of the process during mining, and their land management plans for when the project is complete.

This project is a potential lifeline to boost the area known as The Gateway to Alaska.

We are in support of this project.
