

## Mary Burtness

To whom it may concern: I know this permit is for waste at the mine. However, I feel it should include the extension of the operation on the corridor to the place where the rock will be processed. The corridor from the mine to Fort Knox will inevitably be a possible place of waste from spills, accidents, tire dust, tire debris, air pollution etc. I recommend you ask the parties responsible for remediation for that portion of the mine as well.

Thank you for this opportunity to comment,
