

## Cassandra Feters

As a young professional working in the metal mining industry, I feel very strongly that this project is important to support. Mining has been a cornerstone of the Alaskan economy and has retired multiple generations before me. I am a proud fifth generation Alaskan, and I believe in my family's legacy of responsibly mining our mineral resources. I firmly believe that Kinross is a responsible company, and I believe in their vision of continuing to utilize their existing mill facility to process ore from other areas. I write this letter fully in support of the Kinross Manh Choh project.
