

# Justin Charpenter

They ramped up polluting the community when caught. Still got permit.

They tried move pollution to WI and then kicked them out Wisconsin. Why doesn't Minnesota?

They lied to community and employees!! Destroyed wetlands!!

Poisoned children and homes in WB and you do nothing are they paying off Governor and politicians because everyone said if public trust lost they were gone but they are still here!!

This is corruption at its finest and this community is suffering and no one is denying this company permits why ?
