

## Julie Britton

I do not know anything about all of this technical stuff however I am GLAD SOMETHING is FINALLY being done about this issue.

I have had 2 family members who worked for them through temp agency. One only lasted a short time as he couldn't handle it there caused his asthma to kick in because of the air quality.

We. Have lived here since 1997/98 and since moving here I have developed a benign tumor in my thyroid, my kidneys and a nodule on my lung(which dr. Won't test unless it gets bigger). I have had more trouble breathing and am now on 2 inhalers and have developed chronic headaches. Now I can not say for certain that any of it is caused by water gremlin but I'm certain the poor air quality they perpetrated did not help my health issues any either.
