

## Soren Stevenson

I am very supportive of the goals of this plan. I would like to see it strengthened with three things that I think would make recycling/compost more used: 1) require curbside composting (and recycling) for everyone in towns above 5000 2) create a system of fines for those who refuse to use recycling or compost or consistently use them wrong, and 3) make the fee structure of differently sized bins more favorable for large recycling bins and small trash bins.

Also, close the Hennepin county energy recovery center. This is an environmental injustice that must stop!
