

Margaret Oconnor

Adding a consumer charge for single use plastics isn't helpful. Ban on them instead and offer grants to help businesses provide compostable or other kinds of packaging could help.

Please also consider an anti litter campaign. This helped in the 1970's consider another campaign for this century is needed.

Offer compostable bags and or packaging to vendors for free.

could there be an offer of money help boost recycling? some states hav companies that offer pennies on each bottle returned.
