

Randy Cameron

I use the Dakota County Recycling Center often. One complaint, had a cast iron sink, they wouldn't take it, an industrial recycler wouldn't take it, not supposed to put it in the garbage, now what? Next item, where do you get rid of prescription drugs? Pharmacy no help, Police Dept removed their drop box.

Lastly, maybe some photos online of plastic stuff that should be tossed in the trash despite it have a recycling marking on it. I was told to toss all black plastic items with recycling markings as nobody recycles it. Prescription drug bottles have recycling markings, told to toss them. If you are supposed to toss prescription drug bottles, what about over the counter drugs, supplements, etc, toss them too? Any plastic bottles containing chemicals, toss them. Should be pretty easy to photograph stuff that shouldn't be in the recycling bin and tell us what to do with it.
