

Kathleen Karsko

Please make cities have 2 curbside pickup dates per year. The annual pickup stopped several years ago and now people just throw items away. With curbside pickup, several people drive around and collect items so the actual pile can go down by 50% before it is picked up. The third week of April and late September would be ideal.

Recycling - many people don't understand what can be recycled. The brochures offer too few examples and I see my neighbors adding a lot of items that cannot be recycled. How about a large poster with pictures and many more items listed. Or a sticker for inside the lid of the recycling can?
