What the public needs to understand and you need to disclose is the COST that will be passed onto the customer to pick up recycle every week. We have manually recycled taking it to the plant ourselves to save on additional cost. This year it was REQUIRED to charge an additional fee for recycle even though we didn't have the service. Our cost increased by 20! YES people should recycle. Education is the key. Currently my G company picks up non recycle every week and recycle every other. The non recycle can is usually half full and we take it out every other week although we PAY for every week. The recycle gets full and over flows. THIS SHOULD BE FLIP FLOPPED! 1-keeps cost the same for consumer and 2- encourages the recycle side vs the non recycle side.
