

## Jake Heidelberg

Thank you for providing the opportunity to share our comments and input. My family and I recycle and also drop off our organic/compost at the Maplewood Community Center drop off site. I am very intrigued by the idea of curbside compost pick-up, and would appreciate more information about this program. Ideally, this would be a relatively low-maintenance, easy-to-use program, as I am confident this would lead to a higher participation/utilization rate. I look forward to hearing more and would encourage you to provide additional details and specifics about this and other waste reduction/repurposing efforts. Thanks again!
