

Erin Oakley

I just wanted to send a thank you for addressing this pressing issue. While I did look over the document I did not read it in detail. However, I did see how much the focus is on reducing (not just trying to get people to compost or recycle) and how many of the goals revolve around getting businesses involved. As an individual there is a lot that I can do, but it is so much better when businesses also feel the pressure so the consumers don't carry all the guilt. Thank you for all that you do!
