I would recommend:

1. 7 County wide plastic bag ban
2. Tax on single use items such as to go cups and water bottles
3. Make composting readily accessible to all. We are currently driving our compost to Chaska. Each city should have their own food compost drop off site.
4. Education on what recycling looks like and what ruins batches. What is appropriate to recycle and what is not.
5. City wide yard waste pick up. A majority of our waste is food and yard waste.
