

Curt Wynkoop

Basically we need to go back to sorting all of our items. Paper in its own container, glass in another, plastic as well and metal in its own. That is how we started out with recycling
Single sort does not work. I know this creates work for individuals however it will help in the long run. I had a neighbor who proposed recycling recovery in the 70's and it rejected by Metro officials as they said residents weren't ready for it. Now 50 years later here we are . His plan would have worked.
