

## Jean Ross

Do not allow U.S. Steel and Cleveland-Cliffs a pass on meeting the sulfate rules, Allowing U.S. Steel their request to discharge 8 times as much is bad enough, but to allow Cleveland Cliffs to discharge 40 times as much sulfate will be a death nell for the wild rice downstream from these mines. This is a clear violation of the federal order that the MPCA finally enforce their own rules and honor the Native peoples rights to hunt fish and gather the manoomin on their traditionally sanctioned territorial lands.
