

Leanna Goose

Please do not allow companies an exemption to rules designed to protect wild rice! Exemptions like this could set a dangerous precedent for pollution. If requests like this are granted companies can avoid installing costly pollution control methods to restrict the sulfate that seeps from the mines and their tailing sites. We need to keep our waters protected from pollution so wild rice can thrive, do not allow any companies to create shortcuts to encourage pollution! Please protect manoomin for the next generations.
