Hello,

Thank you for the opportunity to comment on the 2024 impaired water list. My comments relate to the list of waters used for the production of wild rice. I compared the list with the MDNR Wildlife Lake Habitat Surveys we have completed since 2013 in the northwest portion of the state and found the following list of lakes where we documented wild rice that are not included on the list of waters used for the production of wild rice. I have included the DOW#, Lake Name, and the number points where wild rice was documented/and total number of points surveyed. If you would like any further documentation, please let me know.
