

Mary Arneson

I implore you to protect Minnesota's treasure of wild rice producing waters. Wild rice producing waters are not just an important native legacy, but a vital source of environmental protection and healthy choices for all of us.

Restore wild rice waters impaired by sulfates.

Add Dark Lake to the list of Wild rice waters.

Support the Wild Rice impaired waters list.

I am privileged to incorporate wild rice in my meals. Please keep the waters and rice clean.

Thank you.
