

Stephanie Johnson

I live on a lake next to the BWCA and would like to see the MPCA limit sulfite loads and restore the lakes that are wild rice lakes. They must update and enforce any permits that have been issued regarding any industry that affects our lakes. I also would like the MPCA clean up the lead in our lakes. This could be controlled by banning lead fishing tackle ...the lakes are our "Minnesota" legacy and let us live up to our "license plates" land of CLEAN 10,000 lakes

Thank you

Stephanie Johnson
