

Tina Yost

When my family and I arrived in Mn in 2000, I had to take my then 7yo daughter to the emergency room because she was poisoned by this states' water supply. This problem has gotten so much worse throughout the state that I have decided to move my family back to Northwestern PA. My hometown of Bradford Pa (McKean Co.) has, to this day, the cleanest, clearest water that you can drink right from the faucet. Mabey give them a call and find out how they do it! I'll be home by spring. I'll send best wishes.
