Description of SWMP

Kandiyohi County submitted a SWMP to the MPCA that proposes an integrated solid waste management system. The SWMP states that over the ten-year planning period of 2023-2033, Kandiyohi County will:

- Generate approximately 34,000 tons of municipal solid waste annually.
- Accept waste at the Kandiyohi County Sanitary Landfill for final disposal.
- Reach a recycling rate of approximately 37% through county-wide curbside collection as well as rural drop sites.
- Facilitate waste reduction, recycling, and segregation of problem wastes from the waste stream.
- Operate a household hazardous waste (HHW) collection facility five days a week with drive-through servicing of HHW. The HHW collection facility offers reuse of products collected and these services are available to the surrounding counties.
- Encourage and support yard waste management at the Kandiyohi Sanitary Landfill and surrounding cities.

SWMP Final Decision

In making a final decision on the SWMP, the commissioner will consider all information submitted by the county, all information received from the public during the public comment period, and all information submitted during a public informational meeting if one is held. The commissioner must also determine whether the SWMP meets the requirements of Minn. R. parts 9215.0540 to 9215.0790. The commissioner's approval will remain in effect for ten years unless the commissioner determines that a shorter period of time is required to ensure that the county implements the plan.
