

re: 3M Chemical Operations (Cottage Grove) - Wastewater Permit

Dear Minnesota Pollution Control Agency:

3M's massive manufacturing plant in Cottage Grove, Minnesota releases up to 6 million gallons of wastewater and stormwater per day. If this water isn't treated properly to remove chemicals, that's a lot of hazardous substances making their way into the Mississippi River — and from there into the wider environment and our drinking water.

I strongly urge you to forbid 3M from dumping any PFAS chemicals into the Mississippi River.

Sincerely,

[12,182 individual commenters - see following pages]
