

Highland Sanitation & Recycling Inc

Hello and good day,

Highland Sanitation & Recycling has an interest in the permit application and it's approval. We are a small, family owned and operated trash and recycling collection company and having additional places to bring the waste we collect, particularly a location that is not a landfill, in Dakota County would be highly beneficial, not just to us as a company but for the residents and businesses in Dakota County and ensuring that they have competitive costs for trash disposal.

The action that Highland Sanitation & Recycling would like the MPCA to take is to approve the permit request.
