

Nobles County Landfill, Inc.

Nobles County Landfill, Inc. thanks you for the opportunity to review and comment on the Chippewa County Solid Waste Management Plan. The plan correctly identifies the Nobles County Landfill as a disposal destination for waste coming from Chippewa County. The draft plan correctly notes that the waste delivered to Nobles County Landfill is collected by West Central Sanitation.

The draft plan uses hauler reports to state that West Central Sanitation has historically collected 2,290 tons in 2023. In January of 2023, the Chippewa County provided Noble County Landfill with a letter attesting to 1,800 tons/year from Chippewa County going to Nobles County Landfill as part of the Nobles County Landfill's Certificate of Need application. Based on this information, we ask that the Nobles County Landfill tonnage identified in the plan be increased to 1,800 tons/year for the duration of the plan
