Owatonna, MN 55060-4935
Draft Part 70 Permit 14700061-101

Dear Kate:

The purpose of this letter is to provide a comment during the public notice period that begins on February 15, 2025 and ends March 17, 2025, regarding requirements contained within Draft Part 70 Permit 14700061-101.

Comment: During the permittee comment period of the draft permit, it was agreed in an email from the MPCA to Viracon that EQUI 11, Emergency Generator (Cummins), Requirement number 5.5.6 was to be removed from the permit. The MPCA email dated February 10, 2025, stated, in part:

“Additionally, the fuel supplier certification requirement has been removed from the draft permit because the certifications are not consistently provided for pipeline natural gas.”

Therefore, as previously agreed, please remove Requirement number 5.5.6 related to EQUI 11, Emergency Generator (Cummins), from the permit during finalization.

Please contact me if you have any questions regarding the content of this comment at jbale@apog.com or at (612) 525-5226.

Sincerely,

A handwritten signature in black ink, appearing to read "John M. Bale".

John M. Bale, PE (MN, WI)
