

Judyth Onufer

I am a resident of May Township. My family moved here from NY 13 years ago and chose to buy a home in this rural community for its quiet character, abundant wildlife corridors, and commitment to retain its rural character as well as protect our environment and habitat. I have no issue with a private parochial school wanting to expand and offer educational programming to its client families. Still, the scale and scope of this project are not in keeping with May Township's commitment to maintaining a rural residential community where business and industry is not supported. LCA is a business. LCA's planned project will indeed negatively impact traffic, runoff, wells, groundwater, and wildlife habitat, just to name a few. If this massive industrial sewage treatment system is allowed to go forward, how will May Township be able to deny or control future plans from myriad business? I am opposed to permitting this project.
