

Bruce Lundeen

To MPCA

I am greatly concerned about the proposed expansion of the Liberty School. The long term effects of the waste water and the effects on the environment and the community can not I believe be entirely foreseen. LCA will continue to grow, and will continue to put stresses on the environment, and on the community. The original size and footprint of the organization was compatible to the rural environment, and seem to be in harmony with its surroundings. This expanded proposal would upset this balance and erode the environment and the community.

Thank you for your consideration on this critical matter.
