

Douglas Faltsek jr

This will destroy the local ecosystem there is farm land and wetlands all around. This ground is not suitable for this type of septic. She filed a lawsuit to strong arm her way in. If you dont want a class action you better cover your ass because it's gonna be a lot. She has issues cleaning and maintaining her own property what do you think will happen with all the garbage and runoff? They cut grass with children in the playground. Trees left lying. Massive brush mound left on the snowmobile trail. Large thick brush not sectioned off in the play ground. Toys left strew across the grounds. A word limit wtf?
