I have questions about the Liberty Classical Academy (LCA) waste permit. My property abjoins the LCA boundaries on two sides. I have attended both Hugo and May township meetings and was surprised to hear via MPCA that the wastewater treatment facility is now potentially destined to be within the Hugo borders which will essentially be placing this system in my back yard. This area is zoned agricultural and I am questioning the installation of a wastewater treatment facility size when it is not needed at this time. I additionally have concerns how this will affect my own water quality and polluting the area, especially in the event of a system failure. Because of the lack of communication between LCA and their neighbors, I would like to request a public hearing. This would allow me and all of us in the surrounding area, an oppportunity to ask questions. Thank you for the opportunity to post concerns.
