

Staci OConnell

Hi Lisa,

The numbers that Liberty Classical Academy gave were for their school hours student/staff ratio. However they hold after-school events, concerts, especially sports if not every night at least 3 or 4 nights a week, with other schools and parents obviously attending, they would most definitely be using their bathrooms possibly showers which means using way more water with all their extra activities. Which is way more gallons of water being used from their original numbers. Not to mention all the vehicles with air quality pollution.

Thank you for your time,
Staci
