

Chris Hause

Public Informational Meeting Request:

I am a resident of May Township, Washington County MN near the proposed site of the Liberty Classical Academy Wastewater Treatment facility. I live in the Browns Creek Watershed District, down stream of the proposed wastewater treatment facility.

Reviewing the Draft Permit documents found online, I did not see details on the precise location of the phase 1 and phase 2 system components.

The draft document only references:

Liberty Classical Academy Wastewater Treatment facility is located at 10158 122nd Street North, Hugo, Minnesota 55038-9428, Washington County.

PLS Location: T31N, R21W, S36, NE Quarter of the SE Quarter

The PLS location: T31N, R21W, S36, NE Quarter of the SE Quarter, would appear to be close to the existing residential dwellings.

I am requesting a that the MPCA hold a Public Informational Meeting to inform the public of the precise location for the phase 1 and phase 2 system components on the property.

Also to provide an overview and explanation of the predictive models used to determine what effect the 25,625 gallons per day of wastewater leaching out of the system will have on the adjacent Goggins Lake and source waters of the Browns Creek trout stream.
