

Heidi Harvieux

This waist water facility does not belong in a rural area like the the east side of Hugo and May Township. I would like to know if this facility was put in for a housing development how many four bedroom homes with this serve? I'm a near by property owner and according to the Met Council I can only put one house on ten acres. Why should this business be exempt to the rural character of our community? I'm a very concerned citizen about such a huge footprint this facility brings to our community.
