

Sheron Prinsen

This is fantastic!

I work for a county program that handles recycling and I would love to be able to tell people that they can recycle all that plastic from boat wrapping. With a state that has so many boat owners this is a huge way to save so much plastic going into landfills. Kudos to the persons who are working on this and I wish you the best on getting a much needed program going. Thank you so much, I will tell all my friends!
