

Cindy Hansmann

Hi my name is Cindy Hansmann, a wife of a miner at Keetac. My husband and I am proud to call the Iron Range home, we see firsthand the importance of mining in the community. Mining supports thousands of local families, provides millions in taxes, and fuels steelmaking nationwide. Modern mining is safe, regulated, and environmentally responsible. We all want clean water, strong communities, and opportunities for our children. Mining directly supports over 10,000 Minnesota families and fuels steelmaking nationwide. Let's make decisions that support both our environment and our families -

Granting this variance for Keetac protects both our communities and our future.

For the good of the Iron Range, Minnesota, and beyond, I respectfully urge you to approve this variance.

Sincerely,
CindyHansmann
