

Joe Koski

As a 4th Generation Miner we need these permits to sustain our industry and way of life here in Northern Minnesota. I personally am laid off From Cliffs Minorca Mine after 18 years of service and this will effect every mine on the Iron Range. Our water is clean leaving the facility. The sulfide rules are not attainable it will shut down everything we need the jobs and our way of life. We have had the same process for over 100 years and we are improving every year the rules are unfair to our communities that need these jobs to survive
