

Sam Duerksen

Summit lake in Jackson county near Windom, MN needs to be at least added to the impaired list but should be on the list to be tested. This lake has been turned into a green cesspool from ice out to December. I contacted the MPCA in Marshall to have this lake added, that was two years ago. This lake is being destroyed by a feedlot that drains into it. You need to look at this lake and at least acknowledge what you're letting happen.
