

Catherine Day

Please take the high road and recommend and complete the full clean-up path (Option 6). I have lived near this site for 40 plus years and know both the beauty of the river and the tragedy of our environmental disregard for it. Doing a partial cleanup is inadequate to the role the river plays in our lives, both here and downstream. This is about generational harms done both past and future. When we treat the river and land as a sacred being, we will all be better off. We treat the river and land as if it were a commodity, and only value it for monetary gain. Without a clean and healthy river, we have little. Please take the full clean up path.
