

Brent Christensen

I urge MPCA to elect Alternative 6. I understand the need for balanced approach to remediation and responsible use of funds, however it is impossible for me to rationalize lesser treatment and cleanup than the full extent at this site so immediate to the Mississippi River and tied to a still-operating corporate industry that seeks to resolve itself of accountability. Moreover, the cost of \$71M is trivial in the big picture, as today for example we see federal agents in the city at a cost of \$18M per week, and numerous state-funded appropriations at this and higher price points. It's time to do the right thing for future generations.
