

Mary Lorentz

This is unacceptable! This "cover up" must go by the people who created it... The Ford Motor Company!!

They have spoiled our land, air and water... all pretty basic to our survival and the future generations of all living things. Ford has the money to "clean up the mess" as they continue to manufacture oil using vehicles. Many Twin City families were raised with paychecks from Ford, and that was good, but the Company didn't clean up after themselves. We as Minneapolis/St Paul citizens demand that Ford clean up this disaster ASAP.
