

Mike Vant

To the MPCA,

Please proceed with Alternative 6 - Removal of all Wastes and Site Restoration. This is simply the only appropriate and responsible option.

The City of St. Paul, along with the ACOE should be held liable for their part in compounding the problem, and Ford held responsible for their malfeasance including complete removal, remediation and restoration of their portion of the toxic dump they left behind at Area C.

Allowing anything less sets a dangerous and unacceptable precedent for current and future polluters that it's perfectly acceptable to endanger public health without liability.

Very sincerely,
Mike Vant
