

Melanie Peterson-Nafziger

Dear MPCA,

I appreciate you seeking public comment on this serious issue caused by corporate irresponsibility. I write to you to urge you to require the Ford Corporation to carry out Alternative 6: Removal of all Wastes and Site Restoration.

They used Saint Paul and the Mississippi River as their dump and now it's time for them to take full responsibility and for you to require them to take full accountability.

I was recently diagnosed with breast cancer despite living an incredibly healthy lifestyle and having no genetic predisposition. The oncologist said it was caused by thousands of little things in our air, water, food, etc. Please force Ford to be fully accountable for being a cause of some of these pollutants in our community. Do not leave Ford's mess for future Minnesotans to deal with.

Thank you.
