

Carmine Profant

I urge you to support Alternative 6: a full clean-up plan for the Ford Area C site. I am a lifelong resident of Minneapolis who has lived, walked, and observed eagles, foxes, possums, birds and other wildlife along the Mississippi for decades. The lives of millions of beings depend upon the health and cleanliness of this major river's water and ecosystems. Ford Motor Company must entirely remediate the problem they have caused and the MPCA must settle for nothing less than that.
