

Kaitlin Kramer

I have lived in Minnesota my whole life and love its beauty and spirit. However, more and more frequently we are being faced with choices that can have massive ramifications on the health of the land and its future occupants. To perpetrate the least harm in our community, I believe Ford should be obligated to go forward with Alternative 6: Removal of all Wastes and Site Restoration. I fear that allowing Ford to just leave this waste in our backyard is setting up a dangerous precedent that will unjustly harm community members nearby. We don't have the option to change the past, but we need to deal with it properly so that it doesn't poison the future.
