

## Anne Maley

I encourage us to pursue a full cleanup. The Ford Company is still in business. It has no political/economic ties to our city so the risk is low. The waste is theirs. They have insurance and liability for these matters. I recognize it's not as simple as I make it, but really it is. They profited by abusing the land and risking the waters that are shared by much of the nation. They know better now. Once you know better, do better Ford.
