

My name is Hunter Massner. I am a resident of Stevens County and am writing this in **support** of the West River Dairy expansion. I also believe the current review process is sufficient and that additional regulatory burdens are unnecessary.

I am a local business owner and expanding the West River Dairy would be a benefit to my business and almost all of the local business owners. As a home appliance and heating and cooling business, Riverview is a large part of our sales. An expansion means more laborers, more job opportunities, and increased cash flow in our community. The expansion would mean opportunities for business directly related to Riverview and others that are not connected at all.

An expansion to the West River Dairy would increase the amount of local revenue. This expansion positively affects much more than Riverview and the local farmers. Each employee and contractor of West River has a need to purchase things to live, therefore increasing local business profits. Everyone needs to buy groceries. Everyone needs appliances. Everyone needs a car, gas, clothes, water, electricity, a home, furniture, appliances, and tools. The list goes on and on. Most importantly services from the repair man, the carpenter, the electrician, and many other businesses that rely on Riverview for a large portion of their business.

In conclusion, the West River Dairy expansion would be great for the local business and the residents of Stevens County. **We fully support** the expansion of West River Dairy.

Thank you,

Hunter Massner
